ABOUT ME

I am an Information Technology student with a strong interest in programming, web development, databases, networking, and computer systems. I have developed my skills through self-learning, online courses, and practical projects using Python, Flask, SQL, Linux, and Git/GitHub. I have completed Harvard CS50x, CS50P, and CS50 SQL and developed several practical IT projects. I enjoy solving technical problems, learning through practice, and continuously improving my skills. My goal is to continue my education in Information Technology and build a professional career in the field.

PROJECTS

08/01/2026 - 16/03/2026

Karimi IT Help Desk System

A web-based IT Help Desk System developed to manage technical support requests and track their progress. The system includes ticket creation, support administration, status management, and a database for storing support requests. I developed and deployed the project using Python, Flask, SQLAlchemy, HTML, CSS, and JavaScript.
